

Dear Chairman Grassley & Ranking member Durbin.

My son above was poisoned by Fentanyl in December 2020 he was poisoned by a dealer he lived in a group home and suffered from schizophrenia. The dealer preyed on the people in that house sold my son what he thought was cocaine and it landed up being Fentanyl he was a trio organ donor he saved three people's lives. The dealer in New York sold Fentanyl and heroin to undercover police officers he was also responsible for the death of another young man his name is Eugene [REDACTED] I got the dealer and he was let go and it's the same scenario over and over we need Justice for our children and for the future children so that another family member doesn't have to go through this crisis. My son Dylan was a active drug user he made a mistake and a bad choice that evening 4 days after his 29th birthday he died. I moderate three groups I advocate for Fentanyl and I'm going to keep on spreading awareness until this crisis comes to a halt thank you for listening in your time

Tammy Plakstis
