

Chairman Grassley and Ranking member Durbin,

Hello,

I am an Angel mom, my name is Tina Eddy, I am writing to you today in honor of my son Tylor Eddy. Tylor was my miracle baby as he was born 5 1/2 weeks early with complications. However he overcame all odds and grew into a beautiful soul until his life was taken from him on 01/17/2019 in Fort Wayne Indiana, by the Poisoning of Fentanyl at the young age of 22. Fentanyl has robbed me of my Only child , Robbed me of watching my only child walking down the aisle, becoming everything he dreamed of and me, and me becoming a grandmother. His smile lit up a room, his caring and loving nature to his younger cousins was something I cannot put into words, he would have been an excellent father! Tylor's death Devastated our family, I am not the same person anymore. The daily struggles of losing a child is something I never want another mother, father or family member to feel, the pain is unbearable. So I am asking you to please pass the HALT FENTANYL ACT WITH NO AMENDMENTS!! We cannot afford to have this bill held up in congress a second longer! We need Permanent scheduling of this illicit drug Fentanyl! Every single hour of every single day another life is lost to this FENTANYL! We have lost more Americans to Fentanyl than both world wars, let that sink in!

I pray daily for the souls lost to fentanyl, to all the family members that are grieving the loss of their family member, and to God to heal us all. Please pass this Bill, Please talk with BOTH side of aisle as this is not right or left issue, this is about American's dying and family's being destroyed!

Thank you for your time,

Tina Eddy
